Summary

Hello, I have loved computers since I was a child. I entered the software industry by majoring in computer programming at university. I continued my career as a backend developer and frontend developer for a long time. Nowadays, I want to advance my goals in this sector by improving myself as a .Net backend developer.

Education

Software Programming
Akdeniz University, Antalya

2016 - 2018

My Projects

ERT ERP-CRM
PHP, Javascript, JQuery, MySQL
The ERP and CRM Program I am developing for the company I currently work for.

Photos App - photoapp.ottoturkiye.com/allphotos

[PHP](#), [Javascript](#), [Jquery](#), [MySQL](#)

It is an application that I developed for the company I currently work for, where you can instantly view the photos taken.

Harita App, harita.ottoturkiye.com

[PHP](#), [Javascript](#), [Jquery](#), [MySQL](#), [Google Apileri](#)

It is an active map application for the company I currently work for, where we show the products we sell on a map that customers can reach.

Red's Jeans Game - redsjeans.netlify.app

[React.js](#), [Node.js](#), [Javascript](#)

It is a game application that I developed as a store simulation to improve myself.

Simple Qmatic

[Node.js](#), [Socket.io](#)

github.com/DogukanAlyanak/simpleQmatic

It is a q-matic application for banks that I developed to improve myself.

Odak Albüm - odakalbum.com

[PHP](#), [Javascript](#), [Jquery](#), [MySQL](#)

A program I developed for the Odak Album company, where photographers can order and control their requests by specifying the options to the album company.

QR Generator

qr.softeast.net

A QR Code creation program that I developed for self-improvement purposes.

BTK kararlarını kaydeden script

[Python](#), [Selenium](#)

github.com/DogukanAlyanak/save_btk_board_decisions

It serves to record all BTK Board decisions. I wrote such a utility because I could not find the law I was looking for and found the query part inadequate.

University Cooperative Education

Jul 2024 - Present

[Laravel 11](#), [Tailwind](#), [PostgreSQL](#), [Jquery](#)

This application is designed to facilitate and streamline the internship management process for universities. It enables students, faculty members, and internship coordinators to manage internships efficiently.

Wedding Photo Sharing Application

[Laravel 11](#), [Tailwind](#), [PostgreSQL](#), [Jquery](#)

This Wedding Photo Sharing Application is a unique platform designed for weddings, allowing attendees to upload photos directly from the event. The bride and groom have exclusive access to view and manage all uploaded photos, ensuring privacy and preserving precious memories.
